Empathy Map

This empathy map represents the perspective of a policy researcher or economics student analyzing country development. It helps understand the user's needs, concerns, actions, and emotions so that the machine learning system can provide fast, dynamic, and reliable predictions of country development tiers.

Empathy Map - Policy Analyst

SAYS • I need a tool to dynamically predict HDI scores. • I hope the predictions are fast and accurate. • I want a transparent model evaluation process.	THINKS • Will socio-economic factors affect the HDI score? • Are the selected training indicators sufficient? • I hope the machine learning model selection is fair.
PERSONA NAME Development Policy Analyst (Researcher/User)	
DOES • Consolidates and cleans large UNDP datasets. • Enters various country indicators to test scenarios. • Checks application prediction response regularly.	• Anxious while compiling sparse data. • Confident if model validation metrics are strong. • Satisfied when predictions are served instantly.
